

1788

Acrylic-Styrene Copolymer Emulsion

Product Description

1788 Sand-Fixing Bond Emulsion is an acrylate-styrene copolymer emulsion designed for wall reinforcement primers, floor reinforcement primers, sand-fixing agents, interface agents, and unpaved/sandy road hardening. It features a small particle size, strong penetrating power, outstanding substrate reinforcement performance, and high toughness.

Product Features

- Small particle size and strong penetrating power.
- Outstanding substrate reinforcement performance.
- High toughness.

Physical Properties*

Properties	Value	Unit	Test Method
Appearance	Milky white with a slight blue tint	—	Visual
Solid Content	36 ± 1	wt%	GB/T 20623-2006
pH	7.5 - 8.5	—	GB/T 20623-2006
Viscosity	100 - 600	CPS	Brookfield DV-S, 2#, 30rpm, 25°C

Glass Transition Temperature (TG)	20	°C	—
-----------------------------------	----	----	---

*Note: *The properties listed above represent typical results only and should not be construed as product specifications. Please refer to the specific Certificate of Analysis (COA) for official specifications.*

Storage

Please store this product in a cool, dry place away from direct sunlight. The storage temperature should be maintained between 5°C and 35°C. Keep the original packaging completely intact.

The shelf life of this product is six months from the date of manufacture. If the product exceeds its shelf life, a performance evaluation is highly recommended before use. Once the packaging is opened, it is recommended to filter the emulsion properly before application and consume it as quickly as possible.
