

918

Acrylic-Styrene Copolymer Emulsion

Product Description

918 is an anionic acrylic-styrene copolymer emulsion designed for interior and exterior wall latex paints, as well as base adhesives for metal colored stone tiles. It features outstanding color development and retention, excellent aging resistance, and superior adhesion and bonding strength.

Product Features

- Outstanding color development and retention.
- Excellent aging resistance.
- Superior adhesion and bonding strength.

Physical Properties*

Properties	Value	Unit	Test Method
Appearance	Milky white with a slight blue tint	—	Visual
Solid Content	48 ± 1	wt%	GB/T 20623-2006
pH	7.0 - 8.0	—	GB/T 20623-2006
Viscosity	2000 - 5000	CPS	Brookfield DV-S, 4#, 30rpm, 25°C

Glass Transition Temperature (TG)	23	°C	—
-----------------------------------	----	----	---

*Note: *The properties listed above represent typical results only and should not be construed as product specifications. Please refer to the specific Certificate of Analysis (COA) for official specifications.*

Storage

Please store this product in a cool, dry place away from direct sunlight. The storage temperature should be maintained between 5°C and 35°C. Keep the original packaging completely intact.

The shelf life of this product is six months from the date of manufacture. If the product exceeds its shelf life, a performance evaluation is highly recommended before use. Once the packaging is opened, it is recommended to filter the emulsion properly before application and consume it as quickly as possible.
