

M201B

Anionic Acrylic-Styrene Copolymer Emulsion

Product Description

M201B is an anionic acrylic-styrene copolymer emulsion designed for high-elasticity waterproof sealants and single-component waterproofing coatings.

Product Features

- Ideal for high-elasticity formulations with an emulsion-to-powder ratio of 1:0.6–1, delivering high gloss, superior water resistance, and exceptional elongation and rebound recovery.
- The cured material strips possess silicone-like properties, featuring high anti-tack characteristics, strong tensile peel strength, and excellent low-temperature flexibility passing below -20°C.

Physical Properties*

Properties	Value	Unit	Test Method
Appearance	Milky white liquid with a slight blue tint	—	Visual
Solid Content	50 ± 1	wt%	GB/T 20623-2006
pH	8.0 - 9.0	—	GB/T 20623-2006
			Brookfield DV-S, 4#,

Viscosity	5000 - 8000	CPS	30rpm, 25°C
Glass Transition Temperature (TG)	0	°C	—

*Note: *The properties listed above represent typical results only and should not be construed as product specifications. Please refer to the specific Certificate of Analysis (COA) for official specifications.*

Storage

Please store this product in a cool, dry place away from direct sunlight. The storage temperature should be maintained between 5°C and 35°C. Keep the original packaging completely intact.

The shelf life of this product is six months from the date of manufacture. If the product exceeds its shelf life, a performance evaluation is highly recommended before use. Once the packaging is opened, it is recommended to filter the emulsion properly before application and consume it as quickly as possible.
