

TX-405

Wetting Agent

Product Description

TX-405 is a slightly yellowish transparent wetting agent. It is specially designed to significantly mitigate water separation and stratification issues, while enhancing hiding power, color development, color fullness, freeze-thaw stability, and providing a fine in-can appearance. Furthermore, it notably improves substrate adhesion, substrate penetrating power, calcium ion stability, and the chemical compatibility among various components within formulation systems.

Product Features

- Strong wetting capabilities.
- High color development performance.
- Excellent freeze-thaw stability.

Physical Properties*

Properties	Value	Unit	Test Method
Appearance	Slightly yellowish transparent liquid	—	Visual
Solid Content	50 ± 1	wt%	GB/T 20623-2006
pH	6.0 - 8.0	—	GB/T 20623-2006
Viscosity	300 - 2000	CPS	Brookfield DV-S, 2#, 30rpm, 25°C

*Note: *The properties listed above represent typical results only and should not be construed as product specifications. Please refer to the specific Certificate of Analysis (COA) for official specifications.*

Storage

Please store this product in a cool, dry place away from direct sunlight. The storage temperature should be maintained between 5°C and 35°C, keeping the original packaging completely intact.

The product has a shelf life of six months from the date of manufacture. If the product exceeds its shelf life, a performance evaluation is highly recommended before actual use. Once the packaging is opened, it is recommended to filter the liquid properly before application and consume it as quickly as possible.

Disclaimer

Shandong Sanjia Polymer Material Co., Ltd. strongly recommends that customers handle and use this product safely and rationally in accordance with the detailed information provided in the Material Safety Data Sheet (MSDS).
